React • **HTML/CSS/JS**

DANIIL GOLSKIY

Junior UI/UX / Product Designer

2 years of experience

PROFILE

Junior UI/UX designer. I design interfaces for web services and applications—from structure, user flows, and prototypes to polished UI. I start by understanding the product challenge, then develop a clear and consistent visual solution.

ROLE **UX/UI Designer | from USD 850/month**

WORK PREFERENCES

Available . Open to freelance and remote work with a flexible schedule; not considering relocation.

PROFESSIONAL SKILLS

UI/UX: interface design, prototyping, responsive design, user flows, components, and design systems.

UX process: basic UX research, user-flow analysis, and developer handoff.

Development: I build my own designs with HTML/CSS and React during hackathons.

PERSONAL QUALITIES

I explain my design decisions and welcome constructive feedback. I keep layouts, components, and developer handoffs organized while continuing to develop my product-research and metrics skills.

SELECTED PROJECTS

Peak / Drivee / interfaces, product case study

Structure, user flows, prototyping, and UI design. My primary product-design case study.

Chestnopro / branding and visual system

Brand identity and a consistent visual language.

Atlanta VPN / UI/UX concept

VPN product interface: screen design and visual direction.

Portfolio
